(Section 40-8, U.C.A., 1953
as amended) and will
employ the following
reclamation techniques
on 65 acres which com-
prise the land affected.
Legal access to the land
affected is by State lease
and unpatented lode
mining claims.

DURING OPERATIONS:

1. Mining and main-
tenance methods will be
carried out in a safe and
orderly manner.

in a natural canyon-like

be complete by grading
existing waste material
for level entry. The
removal of little brush

tilation shafts will be
sealed to prevent

will be contoured to a

configuration.

5. Maintenance procedures for revegetation will be accomplished as necessary. The sites will be checked at least biannually by Plateau Resources personnel who will immediately augment any necessary steps in revegetation or erosion control. Critical sites and those not responding as projected will be checked more often.

Reclamation performance surety will be posted prior to final approval of the reclamation plan.
